# How to build a mini wildlife pond

You will need:

- an old bucket or watertight container
- spade
- sand
- old bricks, rocks and pebbles
- native pondweed (eg. curled pondweed)

1. Dig a hole deep enough to hold your container.

2. Remove any sharp rocks and line bottom with sand.

3. Sit the container in the hole and fill the gaps with loose soil.

4. Build a pile of rocks and bricks in bottom, scatter pebbles and add pondweed. Fill with rainwater.

Level with ground

Provides hidey holes and helps animals get in and out

Original hole filled in with loose soil

Sand
